PREFACE

Do you recollect the days of your Catechism classes during your childhood? What were the striking features of those classes? Shouldn’t these children you are teaching now also get all that you have received then? Don’t you still remember the joyful experiences you had during Sunday school days? Shouldn’t such experiences be given to today’s generation as well?

Do you remember what you disliked about the Catechism classes of your childhood? Was there any experience that had diminished your interest in Sunday Classes? In that case isn’t it necessary for us to take care not to have such unpleasant experiences for our children? In your attempt to impart faith formation to the third standard students sitting before you, the above-mentioned points have to be taken very seriously.

It is also important to bear in mind that the times are changing. Tremendous changes have taken place in the circumstances in which today’s children live, not only in their aptitude but also in experiences. These have to be taken into account. At the same time, the very aim of faith formation is to concretize in children the unchanging God and the unchanging Christian truths in a world which is under the sway of perennial change. The text which you are going to teach will help you achieve this goal. What you have in your hand now is the Teachers’ handbook specially prepared for your reference. This will undoubtedly help you become an able and efficient teacher by developing children’s innate talents and at the same time solving their difficulties.

WHAT IS A TEACHER’S HANDBOOK? WHAT IS IT FOR?

A teacher’s hand book is

- A supplement to text book.
- A pointer to teacher.
- An interpretation of the lessons.
A teacher’s hand book is an aid to a teacher in many ways.

- To understand the lessons better.
- To teach the lessons correctly.
- To clear doubts regarding the text by one’s own self.
- To give a satisfactory clarification to children’s doubts.
- To organize classroom programmes efficiently.
- To identify answers to the questions.
- To make the optimum use of the text.
- To gather more information.
- To improve one’s way of teaching.
- To introduce and implement the novel approach of the new textbook.

Three questions arise with regard to teaching:

1. What is to be taught? What is the aim while teaching?
2. Whom to teach?
3. How to teach?

All teachers engaged in the process of imparting faith formation must seek answers to these questions.

1. **Must know what faith formation is.**

The basic purpose of faith formation is to help those who received the sacrament of baptism to grow in Christ by leading them to a perfect Christian faith and a mature Christian living. In order to achieve this, a true faith formation process will blaze the trail towards knowledge, experience and life of faith. The passionate words of St. Paul- ‘the labour pain is experienced, till Christ is formed in you’ should be the source of inspiration for our faith formation. The initial years of faith formation focus on the basic lessons to be imparted to children in the fundamental faith of the church, in the Holy Trinity and in the knowledge about sacraments. In this way we must grasp the essence of the question what is to be taught.
2. **Necessary to know children:**

It is to children that we give faith formation. Therefore, we must have an idea of their age, nature, talents, drawbacks, interests and potential. Let us just think what abilities they have. What all can they do?

- Laugh
- Cry
- think
- see
- hear
- Run
- Jump
- play
- speak - and many more abilities like these. Now if we consider just one aspect, for example, their ability to speak- What are their possibilities that can be explored and expressed in class? Children will be able to do many things through spoken words. Let us jot them down.

- To tell stories
- To sing a song
- To ask a question
- To give answer
- To share a news with others
- To explain to others what they know
- To speak imaginatively
- To narrate an incident
- To complain
- To give instructions
- To narrate looking at a picture and so on.
Now the children who love to play can do many things through that activity. What are they?

- To understand instructions
- To obey the rules and regulations
- To react when the rules are broken
- To correct errors
- To express joy
- To express emotions
- To work in a team
- To participate in activities with enthusiasm.

There are many things like these to know about children. If teachers are aware of these, teaching will be more meaningful.

There are many ways by which teachers can come to know of children –

- Interaction with children
- Keen observation
- Knowledge in child psychology
- Reading such books.

3. Necessary to Know New Methods of Learning:

Times have changed. As we face a new environment today, a new set of children and a new text, we need to introduce new methods of learning. Novel ways of teaching need to be adopted.

As discussed earlier, many different abilities are there in every child. New methods of learning must be used to explore these abilities in children appropriately. Opportunities have to be made available to children who are keen on playing as well as doing work. The new text books are prepared with these thoughts in mind.

This book gives scope for numerous activities such as speaking, viewing, drawing, writing and playing besides listening. None of these is insignificant. Though they appear simple, each activity in some degree contributes to the growth of our children’s
faith. It is necessary to use all the possible methods in our attempt to give our children Jesus and lead them to salvation He offers. Therefore faith formation teachers must constantly endeavour to grasp novel teaching methods. This teacher’s handbook may help teachers to a certain extent to achieve this goal. A teacher must try to gain knowledge and experience with regard to teaching methods from all possible quarters.

The Special Features of the Activities:

If the activities that are introduced in faith formation class have to be successful, they must be different. Only then it will be fruitful. What are those special aspects? The activity that is introduced to facilitate learning should

- Arouse interest in children
- Suit the nature of the children
- Give freedom to children
- Be with a specific aim
- Be connected with the subject
- Be a time bound activity
- Be suitable for the standard of the children
- Be a challenging activity for the children
- Be an activity that can be evaluated by the teacher

Be it an activity given to children from the text or from teacher’s handbook or an activity introduced by the teacher himself/herself, the above mentioned aspects have to be borne in mind.

A teacher may pay attention to the following:

1. Make sure that every child has a text book with him/her. Instruct them in the beginning itself to buy it.

2. There are many opportunities for first and second standard children to draw and colour; therefore, all children must have sketch pens of different colours, colour pencils or crayons with them. Along with their text, children should bring these as well.

3. Drawing and writing in the text have to be done only in class.
This instruction has to be given to children well in advance. Children should use the text only as per the instruction of the teacher.

4. More activities, if necessary, can be given to children as homework. Instructions towards this have to be given to them very clearly. It is good to have a special notebook for children to draw, write and stick pictures. Considering situations and the interest of a teacher, these can be done.

**As the lessons are introduced**

Now that we have already thought about faith formation, children and new methods of learning, our attempt now is to analyze each lesson specifically. Special format is adopted for this purpose. It is as follows:

1. **What children should understand**

   Through a lesson what a child is expected to grasp is mentioned here. They are categorized into three and presented. A teacher thus becomes very clear as to what the child should have grasped through that lesson. Besides answering questions and participating in activities, the following have to be acquired by children for their faith formation.

   • Concepts
   • Attitudes
   • Habits.

   All other activities done in class aim at acquiring these aspects by children.

2. **The tools and techniques to enhance awareness that a teacher must use in class:**

   In order to present each lesson effectively various teaching tools have to be used. For first/second/third/fourth standards a teacher can carry to class items like pictures, charts and things that can be collected easily. Apart from the items listed in teachers’ handbook, if other items are used, that are appropriate, it will be more beneficial to the students. Therefore, the indications given here may be taken only as a guideline.
Songs, stories, games, skits and so on may be needed to teach a lesson properly. At least a mental preparation to this effect has to be there before going to class. These are also teaching tools.

3. **Presentation of a lesson**:

How to present a lesson, how to begin, what details are to be included etc are explained in this section.

In any case, the method of presenting a lesson by reading it from one end to another should be strictly avoided. A teacher should be able to start, continue and end a lesson in a way that appeals to children. Some indications to this effect are given in the section dealing with presentation of a lesson. Still if you come across a more attractive method, you may use it. Remember that maximum preparation is required for the presentation of a lesson.

Story telling, cartoons, dramas, role play, songs, conversation, team work or any such method can be used for presenting a lesson. Still if the teacher can use some tools for which he/she has the talent or aptitude to use the class may be more interesting and more efficient. The lesson can also be presented by involving children in these activities.

4. **Activities related to the lessons**:

The instructions regarding all activities given in the lesson are incorporated in this section. Answers to the questions are also given. Let the children find out the answers to these questions on their own and also the answers to the personal response questions and write them. Teachers may assist them. Do not insist that the answers written by children should contain the exact words / sentences as seen in the teachers’ handbook. Treat the answers given in the teachers’ handbook as mere references for teachers to help the students in finding the answers. Teachers can refer to the handbook and help them with the answers that are difficult for them to find out. It is mandatory to complete all activities given in each lesson.

5. **Correlated Activities**:

These are activities that are not given in the lesson but can be introduced as per the wish of the teacher. It is appropriate to give, according to the situation, maximum number of related activities. Some other activities which are not there in handbook too can be used in class if available. More questions from the lesson are
prepared and added. It would be a good practice to keep these answers ready with the teacher. Remember that all the correlated activities are to be done in class as per the wish and the creative approach of the teacher.

The factors to be borne in mind for each lesson:

1. It is assumed that two days (Sundays) may be needed to cover one lesson. Therefore, it may be appropriate to divide the lesson into two parts and prepare properly for each day. If possible it would be better to include lesson as well as activities on both days.

2. Children are expected to do all the activities in class and two days might be sufficient to do all these. Instructions for each activity need to be given very clearly and correctly. In case there is something which they have to do at home with the help of parents, it should be assigned to them on the first day so that they can complete it and bring it on the second day.

3. In all the lessons of the Third Standard, a prayer (Let Us Pray) is added. They should be said by the children repeating after the teacher. Teachers have to train the children to say the prayers with piety joining hands.

4. Each lesson contains one or two songs (Let Us Sing). Children should be given opportunity and time to sing them melodiously. They may sing them again alone or as a whole class or forming groups. Other songs and prayers which go with the lesson can also be given.

5. That which is meant for by hearting as far as possible, need to be done in class itself. It can be read out to them once or twice. Instructions can be given to study it individually or in a group. A small gift or a gesture of appreciation or applause may be offered to those who complete the task with focus and on time. It may be good to motivate them to study it with slight competition spirit and say it in class.

6. What is given under the title ‘My Decision’ is the attitude and practice that have to be formed in a child. ‘My Decision’ in each lesson has to be explained to the child. It has to be impressed upon them. It is also necessary to find out how much of this decision they have implemented in that week.
7. The activities such as Bible Reading and ‘My Bible verse’ are meant for encouraging them in the Bible study and Bible reading. On the first day instructions have to be given to the children to read the Bible, write Bible verses and bring them to the class. It has to be checked in class by the teacher on the second day. While teaching the first lesson, the teacher has to carry the Bible (the complete one) to the class and read out to the students Genesis 1:26-31. Each student then will be asked to write one verse which they liked from this portion in their note book. They will do similar exercise in other lessons at home with the help of the parents after reading the Bible.

8. In most of the lessons there are opportunities for storytelling. Teachers must try their best to say stories in most of the situations. Sometimes children should also be given a chance to say stories. Stories should be presented in such a lively manner that it arouses their interest and develops their curiosity and they get the main idea. In order to do this following points are to be taken care of:

- Narrate the story with all the minute details.
- Describe the characters and events in a picturesque manner.
- Use words and styles that are appropriate for children.
- Ask some questions during the narration.
- Complete the story with the help of children if possible.

Instead of saying some story, it is necessary to find out stories with certain concepts that will enhance faith formation.

9. There are many opportunities in the text for conducting games. Do not miss these opportunities. It is good to find out more games for children. While introducing games in faith formation class following points have to be borne in mind:

- Games that are appropriate for the class atmosphere are to be chosen.
- Instructions to be given correctly and clearly.
- Children should be told to follow the rules of the game strictly.
- Stress to be given more to ‘playing a game together’ than winning or losing.
- Involvement of every child to be ensured.
- It should be observed whether the goal is achieved through the game.
- The games to be used as opportunities to evaluate the attitudes and habits of children and to correct them if necessary.

**Three more points to remember:**

1. Teachers’ handbook has to be read carefully and completely. Analysis of each lesson has to be comprehended clearly. Reading the text books of Std 1, 2, 3, 4 and the analysis given for a lesson will definitely make the teaching exhaustive and efficient.

2. Thorough preparation of the lesson has to be done with the help of analysis given for each lesson. With proper lesson plan, teaching becomes much easier and focused. Lesson plan means deciding in advance what is to be given to children and in what way as well as what activities are to be done in class by children and so on.

3. It would be a good practice to write the lesson plan in a note book so that class can be conducted referring to it. It can be prepared as per each teacher’s convenience and aptitude. Preparing teaching notes will help prepare better. Additional information and activities collected from various sources can be written in this book.
